# Azure Migration Program

The Azure Migration Program (AMP) provides prescriptive advice and tools that you need to simplify and accelerate your move to the cloud – from start to finish. Customers work hand in hand with Microsoft experts and specialized migration partners, following best practices and using proven cloud adoption methodologies, tools, and resources.

## How can you benefit from the Azure Migration Program?

### Curated, step-by-step guidance

Expert guidance and resources from FastTrack for Azure engineering and specialized migration partners based on the proven Microsoft Cloud Adoption Framework for Azure.

### Technical skill building

Learn with foundational and role-specific courses to develop new Azure skills and ensure long-term organizational readiness.

### Offers to reduce migration costs

Azure Hybrid Benefit, Azure Credits, partner funding and free extended security updates for Windows Server can help offset migration costs. Plus, get free Azure migration tools to assess and migrate workloads.

## Who is eligible to use AMP?

Azure Migration Program is available to all customers through direct application, partner or Microsoft account team nominations. To get started customers need to have a confirmed executive sponsor, an active agreement and a and a near-term project timeline.

- Best practices and guidance
- Technical skilling
- Free migration tools
- FastTrack for Azure assistance
- Offers and incentives
- Specialized migration partners

**Frequently asked questions**

## How do I join the Azure Migration Program?

- **Contact us:** Start by submitting a simple form via [azure.com/amp](azure.com/amp) telling us about your migration project.
- **Find out more:** After you submit the form, a Microsoft team will assemble a mix of resources and advise you on the next steps.
- **Migrate and maximize your ROI:** We will help you to assess and migrate your environment. In addition, we'll provide you with resources to optimize your costs and secure your environment for ongoing success with Azure.

## What defines the migration project?

Your migratable estate may include a diverse set of workloads such as Windows Server, SQL Server, Linux, open source databases, SAP, etc. The AMP project scope provides technical assistance and incentives to help you migrate up to a certain percentage of your workloads with a specific focus on Windows Server, SQL Server, Linux and Azure VMWare solutions. Support for additional scenarios will be announced at a later date.

## Who is eligible to use Azure Migration Program?

The Azure Migration Program is available to all Azure customers through self-nomination, or nomination on a customer's behalf from a partner or Microsoft account team.

## What will the Azure Migration Program offer cost me?

There is no additional cost for participating in Azure Migration Program itself. There may be costs that a customer will be responsible for during the migration of their estate.  The partner funding available through Azure Migration Program is designed to help offset some of these costs, including, for example, costs for a partner helping with planning or migration to Azure.

## How does the Azure Migration Program work with partners?

We believe that every customer can benefit from using Azure and should engage with a migration partner on this journey. We will either provide you resources directly or help by matching you with a partner if you don't already have one.
